

Electronics Information Transmission

ABSTRACT OF THE INVENTION

5

A method and a system of the invention are for assisting a user in getting the new electronic information. The electronic mail provider actively provides identification information of a new electronic mail. Then users can get the message about arrival of a new electronic mail and its identification information without making any dial-up connection to the electronic mail provider. The invention can improve system and method of electronic mail provider for transferring electronic mails. The invention also can improve the method and system for users to get electronic mails. Furthermore, the invention can extends only to notify users having new electronic mails without providing complete identification information.
